

DUDEKULA BEE

3rd year Information Technology student with strong programming, Data Structures, and Algorithms skills

☎ 7396615310 ✉ dudekulahazrabee9989@gmail.com 📧 LinkedIn 🐙 GitHub 📍 hyderabad, India

EDUCATIONS

ACE Engineering College

B.Tech in Information Technology

• CGPA: 9.53/10

2024 - 2028

CGPA : 9.53/10

WORK EXPERIENCES

Artificial Intelligence Intern | Internship

Codealpha

Jan 2017 - Jan 2019

Remote • Remote

- **Developed AI-powered applications** including a **Career Suggestion Chatbot** and **Language Translation Tool** to automate career guidance and multilingual communication tasks.
- **Applied Artificial Intelligence, Natural Language Processing (NLP)**, software design, testing, and debugging concepts using **Python** to build intelligent and scalable solutions.
- **Delivered 2 end-to-end AI projects**, strengthening problem-solving, system design, and real-world application development skills.

Technologies / Skills Used : Python, Artificial Intelligence, Natural Language Processing

Java Full Stack Intern | Internship

Eduskills Foundation

Jan 2017 - Jan 2019

- **Completed hands-on training in full-stack application development**, covering frontend, backend, database management, and deployment workflows.
- **Applied Java**, web development, database design, object-oriented programming, and software engineering principles through guided projects and technical mentoring.

Technologies / Skills Used : Java, Node.js, Express, Tailwind CSS

PROJECTS

Multi-threading Task Processor System

- **Developed a concurrent task processing system** in **Java** that executes multiple tasks in parallel, leveraging multithreading and synchronization mechanisms to ensure reliable task execution.
- **Optimized resource utilization** and system efficiency by implementing thread coordination, debugging, and performance analysis techniques while preventing race conditions.

Technologies / Tools Used : HTML, CSS, JavaScript, Spring Boot

AI Career Suggestion Chatbot

- **Developed an AI-powered career recommendation chatbot** in **Python** that analyzes user interests and skills to deliver personalized career guidance in real time.
- **Enhanced accessibility** to career insights by incorporating recommendation logic and conversational AI techniques to generate data-driven suggestions within seconds.

Technologies / Tools Used : Artificial Intelligence, Python, NLP

Attendance Management System

- **Built a full-stack attendance management system** using **Node.js**, **JavaScript**, and **SQLite** that automates attendance tracking through QR-code and location-based verification.
- **Improved attendance accuracy** and reduced manual processing effort by over **80%** through secure backend APIs, database management, and automated validation workflows.

Technologies / Tools Used : HTML, CSS, JavaScript, Node.js, SQLite

SKILLS

Databases :	MySQL, SQLite
Frameworks & Libraries :	Spring Boot, NodeJs, TKinter, Pandas, Numpy
Programming Languages :	Java, C, Python, HTML, CSS, JavaScript
Tools & Platforms :	Git/GitHub, VS Code, Google Colab, Anaconda, IntelliJIdea

LEADERSHIP

- **Worked as Student Placement Coordinator** to facilitate communication between students, recruiters, and the college placement cell, strengthening leadership, communication, teamwork, and organizational skills by managing placement initiatives across multiple student groups.
